## Case Study House 2B-006-Mustang House

Stepping into this home is like sliding behind a Mustang—an icon defined by clarity of line, purposeful geometry, and a sense of forward motion. The plan is long and lean, a fastback profile translated into architecture, with every space arranged as if along the length of a powerful chassis.

At the far left, the entry sequence functions like the mechanical centre of the home: compact, efficient, and engineered for performance. The bathroom and kitchen zone placed at the front of the plan echoing the Mustang engine placement, where precision and power first come to life.

Following the main axis, the layout opens into a straight, uninterrupted living and dining zone—a sculpted interior body, clean and rectilinear, carrying the confident spirit of mid-century design.

At the opposite end, the plan widens into two bedrooms—balanced, symmetrical, and subtly flared. Each room mirrors the other, like a pair of perfectly formed seats ready for their passengers. Here, the home reveals its equilibrium: a quiet dialogue between power and elegance, expressed through symmetry, proportion, and restraint. A true architectural nod to a cultural icon.
